THROUGH YOUR ONLINE STORE

THE PERFECT SOLUTION FOR COMPANIES WHO WANT TO MANAGE THEIR
PRODUCTS IN SAP B1 AND WANT TO SELL THROUGH AN ONLINE STORE

- ✓ The benefits of a world leading Open Source e-Commerce platform
- ✓ Product information, prices, customers and orders are managed from your SAP system
- ✓ Up-to-date stock levels from SAP Business One are directly linked to your online store
- ✓ Possible to load real-time prices for business partners or business partner groups from SAP Business One

WHO CAN BENEFIT FROM USING MAGENTO XML?

Magento XML is the solution to provide an online store for both big and small businesses. Serac offers you the ability to fully or partially integrate your SAP Business One with Magento, Free open source or the Enterprise Edition, to create an online store that fits your business needs.

WHAT ARE THE BENEFITS OF USING MAGENTO XML?

With our Magento integration, you'll have an clear, professional online store that can be managed from your SAP Business One environment.

THE POWER OF MAGENTO ECOMMERCE

- ✓ The freedom of either a fully custom build store or a store build by using a template.
- ✓ The benefits of an Open Source system with extensions and modules.
- ✓ Running multiple online stores and store views on one installation, to provide multiple languages, currencies or theme shops.
- ✓ A user friendly backend system for managing your content pages.
- ✓ The possibility to choose timers before clearing your shopping carts.
- ✓ Extended search options on your frontend by filtering on product characteristics.

“Magento won the “Best of Open Source Enterprise Applications” award two times in a row, and has won multiple awards ever since. Magento provides the software for over 240.000 online stores, including businesses like Nespresso, Samsung, 3M and Lenovo.”

THE BENEFITS OF INTEGRATING MAGENTO ECOMMERCE

INTEGRATION OF THE MAGENTO AND FASHION ADD-ON

Magento has configurable products. Products that are available in several colors and sizes, show at the frontend as one item. SAP B1 does not know this type of product, but it is possible to easily create and maintain these products with Serac's Fashion add-on.
